

BEFORE OLD BATHTUB

AFTER MODERN LUXURY SHOWER

Bathtub to Standing Shower Conversion (Labor Only)

1. Demolition & Disposal

- Dismantle and remove the existing bathtub.
- Chop and remove the designated floor and wall tiles surrounding the area.
- Clear and responsibly dispose of all project-related debris.

2. Preparation & Waterproofing

- Plaster and smooth the exposed walls to perfectly prepare them for new tile installation.
- Supply and apply high-quality waterproofing to the entire shower zone to ensure a leak-proof seal.

3. Tiling & Masonry Works

- Install new floor and wall tiles inside the converted shower area.
 - *Note: Tiles to be provided by the Client; installation labor by the Contractor.*
- Apply tile adhesive (glue) and premium tile grouting.
 - *Note: Tile glue and grout to be provided by the Client; application labor by the Contractor.*

4. Plumbing & Glass Installation

- Install a new linear/long floor drain (Size: 7cmx50cm). (*Drain provided by the Client*).
- Install a walk-in shower glass panel (10mm clear tempered glass 200cmx90cm). (*Glass panel provided by the Client*).

Project Duration: 5 to 7 working days.
